

## **Types of industries that may not survive in 2028?**

Kodak company which started in 1998 grew with 0.17 million employees as a photography giant in the world. How is it today? It is closed. Why? Another firm invented a technology that makes photographs to be printed in ordinary paper. This disruptive technology made Kodak products obsolete. Big manufacturing companies are afraid of new developments by start ups that may disrupt their business.

What happened to Kodak will happen to several companies in next 10 years. Artificial intelligence, IOT, Cloud technology, mobile communication will change the entire industrial scenario.

Do you want examples?

Uber, a taxi aggregation company is world leader in call taxi services. They do not own a single car! Power of software.

For legal clarifications, we approach lawyers. IBM Watson started giving solutions to legal queries with an accuracy of over 90% at throw away price. Who will go to Lawyers? As per prediction by American Bar council, 90% of Lawyers will vanish in next 10 years. Same thing with auditors. Computer will replace them.

Tesla, Microsoft, Google are working hard to develop driverless autonomous cars. Simply call the taxi in mobile. Car will come to your home, pick you and drop at your destination, all by itself. No need of each one owning cars. Drivers, Mechanics, Driving schools, Driving license authorities, all will vanish. Nobody will buy car and nobody will know driving. Car manufacturing and sales will fall drastically. Accident rate will fall down. Insurance companies will close for want of clients

Gas cars will become obsolete and electric cars will take their place. Electrical engineers will replace Automobile engineers.

Car travel will become cheaper. People will not stay in city limits paying exorbitant price. Drastic reduction in real estate price.

App based e-commerce companies like Amazon will wipe out big stores and malls.

Banking will be only through mobile. Many bank buildings will be empty.

Agriculture will be highly mechanized and automated. Farmers will be engineers operating advanced farm machineries.

Drinking water will be through machines that take water from atmosphere from its humidity.

Tricorder X will work with your mobile. It will check your eye, test your blood for disease marker, diagnose your problem and suggest medicine. No need to go to Doctors for consultation. Hospitals are for inpatient admissions.

Some industries like Tourism, Hotels, Textiles, Entertainment will do very good

Many jobs popular today will vanish. New types of jobs will come.
