

## **Now your Audi car can read traffic lights !**

Audi has released its Traffic Light Information System in US. It is now available in Washington DC. The vehicle to infrastructure system (V2I) on some 2017,18 Audi models can receive from a centralized traffic light management system on how much time red light turns into green through the car's built in 4G LTE hot spot. System supports traffic signals of more than 1600 intersections in US, spread across cities like Dallas, Denver, Houston and Palo Alto, it is learnt.
